PROFESSIONAL SUMMARY

AI/ML Developer focused on building scalable intelligent systems, agentic workflows, and data-driven Web Applications. Experienced in Python, TypeScript, System Design, and Full-Stack Development, with a strong problem-solving foundation in algorithms. Passionate about creating automation-first products that deliver practical business impact.

EDUCATION

Bachelor of Technology (Artificial intelligence) Newton School of Technology, Rishihood University	2024 - 2025 Grade: 8.7/10.0
Intermediate (Class XII) Lady Florence Convent School	2022 - 2023 Grade: 80.4%
Matriculation (Class X) CD International School	2020 - 2021 Grade: 83.4%

PROJECTS

ChurnCortex ([Github](#)) ([Demo](#)) April 2026

- Built **ChurnCortex**, a scalable **agentic AI system** for high-precision customer retention, enabling teams to perform churn prediction, generate personalized recovery strategies, automate marketing workflows, and engage users via **RAG**.
- Engineered using **Python**, **Streamlit**, **Scikit-learn**, **Groq (LLaMA-3)**, **ChromaDB**, and **Sentence-Transformers**; developed end-to-end machine learning pipelines, performed **data preprocessing** and **feature engineering**, implemented optimized **Decision Tree classification** (97.9% accuracy), and designed structured agent orchestration.
- Reduced churn latency via real-time inference and automated decisions, improved retention targeting through data-driven insights and user behavior, and enhanced performance with **RAG retrieval**, **feedback loops**, and **scalable analytics**.

TrustTrade ([Github](#)) ([Demo](#)) April 2026

- Built **TrustTrade**, an agentic AI marketplace platform for business asset transactions, enabling intelligent asset discovery, **automated negotiation**, and end-to-end transaction management through stateful **multi-agent workflows**.
- Developed the platform using **Python**, **LangGraph**, **LangChain**, **Groq (Groq Llama 3.3)**, **Node.js**, and **MongoDB**, architecting a scalable **RAG-based conversational intelligence system**, intent-driven response pipelines, asynchronous microservices, and persistent session management for grounded AI interactions.
- Enhanced transaction efficiency through a **Strategic Negotiator Agent**, **AI-powered recommendations**, **order automation**, and **intelligent navigation**, improving deal conversion, engagement, and transaction workflows.

CERTIFICATIONS

Intermediate Machine Learning Kaggle ([Link](#)) April 2026

- Gained hands-on experience in **feature engineering** and **model validation**
- Built predictive models using **Random Forest** and **Decision Tree** to improve **accuracy**

SKILLS

Computer Languages: Machine Learning, TypeScript, NoSQL, HTML, JavaScript, Python, SQL

Data Tools: NumPy

Software Packages: Pandas, Matplotlib, Prisma ORM, Node.js, Excel, MySQL, MongoDB

Additional Courses: Data Structure

Soft Skills: Leadership, Time management, Decision-making, Presentation Skills

Others: Docker, Spreadsheet, LangChain, OpenAI API, GenAI, LangGraph, Kafka, Hugging Face, LangSmith, OAuth 2.0, Tableau, Entrepreneurship, LLM

EXTRA-CURRICULAR ACTIVITIES

- Participated in the Smart India Hackathon and secured 1st position at the college level.
- Active member of the AI/ML Club, contributing to discussions, activities, and learning initiatives.
