PROFESSIONAL SUMMARY

Web Developer focused on building **scalable, responsive, and data-driven Web Applications**. Experienced in **TypeScript, System Design, and Full-Stack Development**, with a strong foundation in **Algorithms and Problem Solving**. Passionate about creating **high-performance web products** and **user-centric digital experiences** that deliver meaningful business impact while continuously learning and adapting to new technologies.

EDUCATION

Bachelor of Technology (Artificial Intelligence)	2024 - 2025
Newton School of Technology, Rishihood University	Grade: 8.7/10.0

Intermediate (Class XII)	2022 - 2023
Lady Florence Convent School	Grade: 80.4%

Matriculation (Class X)	2020 - 2021
CD International School	Grade: 83.4%

PROJECTS

TrustTrade (Github) (Demo)	March 2026
---	------------

- Built **TrustTrade**, a scalable full-stack B2B/B2C marketplace for high-volume digital transactions, enabling users to discover listings, request quotes, negotiate pricing, complete deals, and engage via **AI workflows**.
- Engineered using **React, Tailwind CSS, Node.js, Express.js, MongoDB, Python, and LangGraph**; built scalable **RESTful APIs** and **backend microservices**, implemented optimized **MongoDB schema design**, role-based **dashboards** for buyers and sellers, and JWT-based authentication with protected routes.
- Reduced latency via **MongoDB optimisation**, streamlined buyer-seller interactions through role-based workflows, and enhanced UX with **LangGraph**-powered chatbot navigation, recommendations, and order placement.

CliQ (Github) (Demo)	February 2026
---	---------------

- Built a scalable full-stack social networking and collaboration platform supporting **real-time communication**, content sharing, and an **AI-driven recommendation** system delivering personalized connections and feeds.
- Engineered using **Python, FastAPI, Node.js, Express.js, React, MongoDB, and LangChain**; developed scalable **RESTful APIs** and **backend services**, integrated APIs, implemented efficient **MongoDB schema design** and queries, and built dynamic frontend components within a **Git-based workflow** using Github.
- Enhanced system performance through **MongoDB data modeling** and **queries**, increased recommendation relevance using **AI**, and maintained application stability through **regression** and **integration testing**.

CERTIFICATIONS

Intermediate Machine Learning Kaggle (Link)	April 2026
--	------------

- Gained hands-on experience in **feature engineering** and **model validation**.
- Built predictive models using **Random Forest** and **Decision Tree** to improve accuracy.

SKILLS

Computer Languages: Machine Learning, TypeScript, NoSQL, HTML, JavaScript, Python, SQL

Data Tools: NumPy

Software Packages: Pandas, Matplotlib, Prisma ORM, Node.js, Excel, MySQL, MongoDB

Additional Courses: Data Structures

Soft Skills: Leadership, Time management, Decision-making, Presentation Skills

Others: Docker, Spreadsheet, LangChain, OpenAI API, GenAI, LangGraph, Kafka, Hugging Face, LangSmith, OAuth 2.0, Tableau, Entrepreneurship, LLM

EXTRA-CURRICULAR ACTIVITIES

- Participated in Smart India Hackathon and secured 1st position at the college level.
- Active member of AI/ML Club contributing to discussions and initiatives.
